Tell us a fun fact about you:

I am a certified PADI Divemaster

Why did you join the military?

I was lost once I was out of high school. I worked a large number of construction jobs for about three years, and one day I had a friend asked if I would join the Marines. I didn't put much thought of what I was getting into and I said yes.

What is the greatest single lesson you learned from your Military Service?

There is something bigger than yourself. The military taught me how to work with people from all backgrounds, and those people have become some of the greatest friends I have ever had.

Why did you apply for the Veterans Accelerated Management Program?

To gain the knowledge of the industry that I am interested in, as well as build a powerful network that I will have for life.

What do you hope to accomplish in the next chapter of your life, both professionally and personally?

I want to become an accomplished management consultant, and associate with a company that meets my work values so that I can provide the life to my kids that they deserve.

What would you tell today's American public about our nation's Veterans transitioning out of the military?

Own your transition. Seize every opportunity that comes your way, the worst thing someone can say to you is no. Service members must start their transition from day one. It doesn't matter if a service member is doing one enlistment or plans on retiring, at some point they have to move on.
